Art Unit: 2166

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 112-137, drawn to a method for using a computer, classified in class 705, subclass 26.
- II. Claims 98-111 and 138-147, drawn to a processing system, classified in class 340, subclass 825.3.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to practice materially different processes, such as word processing, playing programmed electronic games, sending e-mail and teleconferencing.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Sam Rimell at telephone number (703) 306-5626.
